Incident Management System

Powerful features, simply designed

At Quality Hub we know employees are more willing to self-report incidents if the system is easy, quick to use, and at their fingertips.

Our intuitive reporting dashboard makes it so simple to log an incident and with early notification the incident can be escalated rapidly to keep your workspaces safe and healthy.

Features

Intuitive Reporting Dashboard

- visible 'real time' incident status
- performance at a glance
- showing linked incidents to risks

Effective Incident Notification

- incident details are simple to capture and review
- record general incidents and reportable events
- early notification and escalation to relevant personnel
- prompt hazard and risk mitigation
- incident reviews can be carried out with ease
- investigation activity can be recorded as part of the 'incident story'
- communications can be captured - upload relevant documentation, photos or audio recordings
- corrective actions can be assigned for incidents
- employees receive acknowledgement of incident record

Reporting and Graphing Suite

- built in reporting function easily captures all incidents
- collate all incidents, prepare reports with a 'click' of a button
- ability to drill down to single incident level reporting

Organisational Wide Functionality

- include customised groupings, departments, wards and services within one system
